INNOVATION TO MAXIMIZE SUSTAINABILITY

Our SpiritCasks are made from sustainably sourced White Oak, which may have unique characteristics not typically found in traditional casks. However, with our innovative SpiritLock and SpiritRx technologies, we can overcome the issues these characteristics typically cause to provide water-tight, structurally sound barrels that impart the same desired flavor profiles you look for when maturing quality spirits.

To the right, you can see some of the common characteristics found in the sustainably sourced wood used to craft our SpiritCask staves and heads.
